

Hello, Yellow

Get up, get happy with spring's sunniest hue. Yellow is hot, whether you have a little or a lot.

Even global warming can't wipe out the drabness of winter. But '07 is off to a brighter start thanks to unmissable flashes of yellow on the streets and runways. From pale pastel to screaming school bus, yellow is the "it" accent for winter into spring, a perfect pairing with black, grey or denim and a sure pick-me-up all by itself.

Look out for show-stopping yellow dresses, belts and handbags. Or if you can't take the heat, be discreet with yellow eye shadow, a brooch or other jewelry. And what's good for the wardrobe is also good for the workplace. Eye-catching yellow accents spruce up your desktop, bag, presentation or portfolio. Just remember: a little yellow goes a long way.
